

PER QUALI H $\det A = 0$?

$$\det A = \begin{vmatrix} 1 & -1 & H \\ 2 & 1 & 3 \\ H & H & 1 \end{vmatrix} = 1 \cdot 1 \cdot 1 - 1 \cdot 1 \cdot H - 3H^2 - 2H^2 = 1 - 1 - H - 5H^2 = -H - 5H^2$$

Handwritten calculation showing the determinant of a 3x3 matrix A with elements $\begin{pmatrix} 1 & -1 & H \\ 2 & 1 & 3 \\ H & H & 1 \end{pmatrix}$. The calculation is shown as $\det A = 1 - 1 - H - 5H^2 = -H - 5H^2$. The final result is $\det A = -H - 5H^2$.

$$\Delta = 49 + 36 = 85$$

$$H_1 = -$$
$$H_2 = -$$
